Comztek awarded Microsoft distribution rights in southern Africa

Technology distributor Comztek has been awarded the Microsoft distribution rights for finished goods in southern African countries Angola, Botswana, Malawi, Namibia and Zambia.

The SA distribution rights remain unaffected. Comztek's Microsoft distribution rights for finished goods and OEM in East Africa, including Kenya, Uganda, Tanzania, Burundi, Ethiopia, Eritrea and Rwanda, have been renewed.

Comztek is an established certified Microsoft Gold Partner, and has been an SA distributor of Microsoft products for the last six years. Microsoft's aim to successfully promote its products into the rest of Africa dovetails with Comztek's strategy to build on its current African footprint, established over the last four years in support of other brands into the rest of Africa.

"Comztek strives to be the preferred partner, chosen by customers, for all communication

requirements," says David Caygill, Comztek software infrastructure director.

"These distribution rights enable us to increase our service offering on one of our core software infrastructure products. We have learned that requirements in the rest of Africa are uniquely different from SA, and Comztek is well equipped to provide Microsoft sales and support."
